

The Next Generation of Advanced Lubrication

nGLIDE®

"If the problem is at the nanometric scale, the solution must be on a nanometric scale too."

Lubricants, reinvented.™

The remarkable super additive, nGlide®, has revolutionized lubricants. Radically reducing friction and wear at the atomic scale while increasing load carrying capacity under the most extreme pressures. The only macromolecular solution, nGlide® increases performance, durability and reliability – achieving top machine performance like never before. This industry-leading, transformative nano science is light years ahead of the competition and is transforming the entire industry.

To see for yourself how NanoMech's patented innovation proves that in the field of lubrication, micro isn't small enough, check out our informative video at nGlide.com. We invite you to test our product and see for yourself. Contact NanoMech to discover nGlide®, and find out why *small is the new big™* in lubrication. You can only go nano with nGlide®. *The New Standard.*
